

PERSONNEL COMPETENCY CERTIFICATION OF PLUMBING SPECIALIST

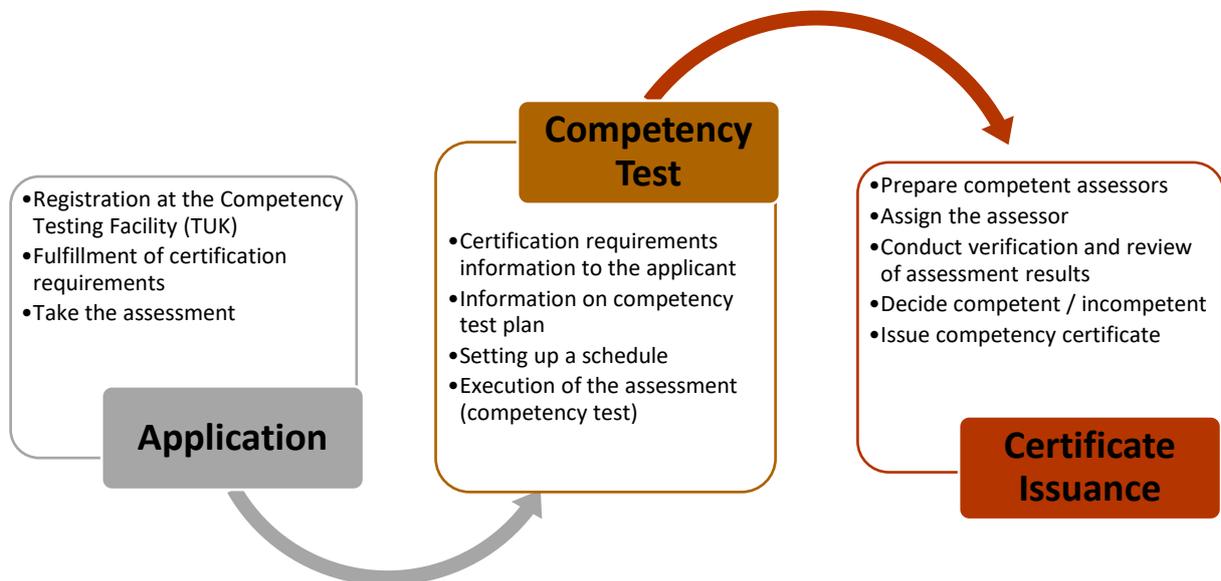

To respond to the challenges that plumbing product suppliers face in ensuring the continuity of their business through increasing the competency of personnel in plumbing system, PT IAPMO Group Indonesia as a Certification Body in the process to obtain accreditation from Komite Akreditasi Nasional (KAN) for plumbing personnel competency certification program as plumbing system associate, water supply specialists, drainage and waste specialist and certified plumbing systems specialists.

PT IAPMO Group Indonesia can serve competency certification requests through competence testing process in accordance with Competency Standards that are fully supported by the Asosiasi Pemerhati Plumbing Indonesia (APPIN), and for those participants who are deemed **competent** by Competent Assessors will receive certificate of personnel competency.

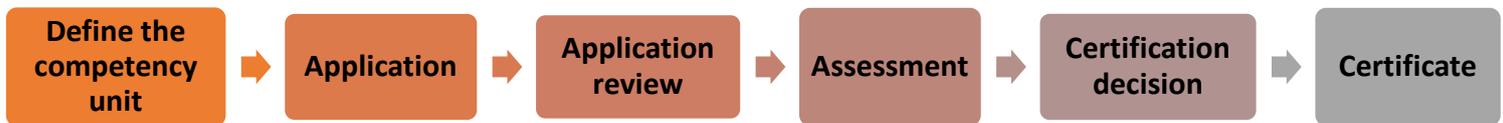

Requirements to take Competency Test

Requirements:

1. Copy of Identity Card (KTP)/Passport/KITAS
2. Copy of the most recent diploma
3. Curriculum Vitae
4. Photograph size 3 x 4 cm, 2 pieces
5. Copy of relevant Training Certificate(s)

Certification Process

Requirement for Certification

Criteria for Applicants

The assessor reviews the competency of the applicant by checking the basic requirements contained in the certification scheme against the applicant's training portfolio and experience. The results of the applicant's review and recommendations are recorded on the applicant's application form.

Applicant Rights

1. Participants who pass the competency test will be given a competency certificate
2. Use as self-promotion as a professional whose competence has been recognized
3. The certificate holder only applies to the competency units as stated in the competency certificates

Applicant Responsibilities

1. Implement profession while maintaining the code of ethics and professional behavior
2. Following the LSP-established surveillance program at least once a year
3. Report activities related to the competencies they have once a year

Maintenance of Certification

LSP IAPMO Group Indonesia conducts periodic surveillance of certificate holders. Surveillance is done by contacting the certificate holder using phone, e-mail and/or text message, and as for surveillance method using administrative and competency aspects.

Each certification holder from LSP IAPMO Group Indonesia is required to continue to maintain its certification ownership by continuously maintaining its competence in accordance with the units / clusters contained in the certification s/he possesses. One way of maintaining certification is:

1. Working on the field in accordance with his/her certification, or
2. Attend training / seminar in the field relevant to his/her certification at least 8 hours for every 6 months, or conducting innovative activities

The certificate holder is expected to send the certification maintenance proof to LSP IAPMO Group Indonesia either in the form of company reference letter stating that the certificate holder still work in the appropriate field of certification and/or copy of training certificate.

Re-Certification

The certificate holder whose certification has expired (after 3 years) may apply for re-certification to LSP IAPMO Group Indonesia by filling out the recertification application form.

LSP IAPMO Group Indonesia will confirm whether the re-certification applicant has provided sufficient evidence of maintaining his/her competency. Then, LSP IAPMO Group Indonesia will verify whether the applicant must take a certification retest since the competence is not being maintained or there are changes to certain units in the proposed competency or any changes to the competency unit version submitted for recertification. If so, LSP IAPMO Group Indonesia shall provide a notification to the applicant.
